M7 Assignment: DOM Object

27 minutes remaining

Assignment Instructions

Submission of this assessment means it is ready for grading. Your instructor may grade assessments before the due date. You have one submission attempt. Any problems notify your instructor immediately.

Requirements:

1. Create a new HTML file called *index.html.*
2. Add a script tag to the head section of the HTML file to include an external JavaScript file called dom-homework.js.
3. In the body section of the HTML file, create a div element with an id of "myDiv".
4. **Use JavaScript to add the following elements to the myDiv element:**
    a. A heading (h1) element with the text "Welcome to DOM homework".
    b. A paragraph (p) element with the text "This is your first DOM homework assignment".
    c. An unordered list (ul) element with three list items (li) containing any text you want.
    d. Add a class of "highlight" to the heading (h1) element.
    e. Add a background color to the heading with the "highlight" class.
    f. Create a button element below the myDiv element with the text "Add new list item".
    g. Add an event listener to the button that adds a new list item to the ul element each time it is clicked.
    h. Each new list item should have a random color and the text "New List Item X", where X is the number of new list item.
    i. Use JavaScript to add an event listener to the myDiv element that changes the background color to a random color when the user clicks on the myDiv element.

Deliverables:

When your work is completed you must upload your files to a new GitHub Repo titled *LastName_DOMObject*. You must submit a working clickable link to your assignment.

Rubric:

1. Create a div element with an id of "myDiv" (5pt)
2. Add a heading (h1) element with the text "Welcome to DOM homework" (10pts)
3. Add a paragraph (p) element with the text "This is your first DOM homework assignment" (10pts)
4. Add an unordered list (ul) element with three list items (li) containing any text you want (10pts)
5. Add a class of "highlight" to the heading (h1) element (10pts)
6. Add a background color to the heading with the "highlight" class. (10pts)
7. Create a button element below the myDiv element with the text "Add new list item" (10pts)
8. Add an event listener to the button that adds a new list item to the ul element each time it is clicked. (10pts)
9. Each new list item should have a random color and the text "New List Item X", where X is the number of new list item. (10pts)
10. Add an event listener to the myDiv element that changes the background color to a random color when the user clicks on the myDiv element (10pts)
11. HTML code is well formatted (5pts)
